Re: **Sales Bulletin**  
**400/422 Locking Cap Update**

This bulletin is intended to cover two issues having to do with the modified locking cap system on the 400/422 operators; new part numbers and product availability.

First, new part numbers are shown below. These numbers are being changed in the on-line price catalog this week. The single basic kit part numbers will remain as they are for the remainder of 2006. Operators ordered under the old style part numbers will be changed internally here at the time of order entry. Your invoices will denote new style operator part numbers.

	<u>Description</u>	<u>Old P/N</u>	<u>New P/N</u>
<u>Mdl 400.</u>	CBAC 115v	1044622	10420112
	CBAC 230v	1044621	1042011
	CBACR 115v	1044642	10420712
	CBACR 230v	1044641	1042071
	EG 115v	1044056	10420212
	EG 230v	1044054	1042021
<u>Mdl 422.</u>	115v	1044372	10420012
	230v	1044371	1042001

Secondly, the following represents an update regarding new style versus old style availability.

- Mdl 400.      CBAC 115v version – The new style locking cap has completely replaced the old style version.
- CBAC 230v version – We anticipate running out of the old style version at month’s end, at which time the new version will be shipped.
- CBACR 115v version – The new style locking cap has completely replaced the old style version.
- CBACR 230v version – We anticipate running out of the old style version the first week of September, at which time the new version will be shipped.

EG 115v version – We just ran out of the old style version today and will begin shipping the new version tomorrow.

EG 230v version – We anticipate running out of the old style at month's end, at which time the new version will be shipped.

Mdl 422. 115v version – We anticipate running out of the old style the end of this week, at which time the new version will be shipped.

230v version – We anticipate running out of the old style the end of this week, at which time the new version will be shipped.

VHS version – The new style locking cap has completely replaced the old style version.

Also, the price catalog on line will also include a new part number for the standard 400 four-rod positive stop. The old number of 490042 is now 490109. Again, we will change the old number internally on all orders.

Should you have any questions, please give us a call.
